

Cubism

Cubism was a 20th century art movement which was started by Pablo Picasso and Georges Brages. It was a short lived movement only lasting from 1907 until 1911. The movement mainly took place in France, but influenced artists all over the world. Cubism was about breaking the image up and reassembling it in a new way making it different from the original.

Extension task: Using colouring pencils provided, colour using tonal shading. Think about highlights and shadowing.

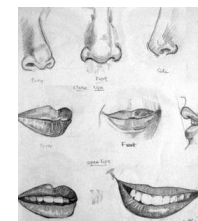

Task: Produce your own cubist style self portrait. I would like you to think about placement of facial features. Use the oval to help guide you with your facial shape. Look at the examples for help.

Think about:

Shapes, size, angles, colour, shadowing, highlights, background.

Facial features help corner
