

List 5 things we can do to reduce the impact clothing production has on the environment. Use the 6'Rs to help you come up with some ideas.

**You will be designing and printing a T-shirt**

**Fashion is now unfortunately the 2<sup>nd</sup> largest pollutant, in the world, behind oil.**

The 6's are a check list used by designers:

Rethink: what could be done differently?

Refuse: are there materials a designer would not use?

Reduce: can the use of materials be reduced?

Reuse: can the product be used again for another purpose?

Recycle: can materials be used that are easy to recycle when the product is finished with?

Repair: can the product be repaired instead of thrown away?

**ASK YOURSELF:**

**HOW MANY ITEMS OF CLOTHING DO YOU ACTUALLY NEED?????**
